Summary:

Frontend Developer with expertise in both web and mobile application development, experienced in working with cross-functional teams. Learning full-stack looking into today's world.

Technical Skills:

- **Programming Languages:** JavaScript, TypeScript, Golang
- **Frameworks & Libraries:** React, React Native, Expo, Next.js, Tamagui, Tailwind
- **State Management:** Redux, Redux Toolkit, Context API, Zustand, Jotai, React Query
- **Cloud Services:** AWS (S3 Bucket), Firebase, Airtable, Supabase
- **Database:** MongoDB, PostgreSQL

Experience:

React Native Developer (Junior Developer) - FinFox | June 2025 - September 2025

- Collaborated with teams to plan and deliver a user-friendly fintech app for Android and iOS.
- Optimized app performance and security for seamless bank data integration and user trust with data visualization.
- Tested and refined AI chat features to ensure accurate spending insights and reliable savings tools.

React Native Developer (Junior Developer) - SRIYOG | December 2024 - May 2025

- Converted old application (made in flutter) client and business needs into functional frontend design using react native (TypeScript) and designing data model Airtable as cloud backend.
- Worked as Solo developer to build responsive applications to make sure that they work well on both Android and iOS.
- Deployed Application in Play Store.

Frontend Developer (Intern) - Arcadia Creation Pvt. Ltd | December 2023 - March 2024

- Translated user needs into functional frontend design using React (JavaScript), and Tailwind CSS.
- Worked with teams to build responsive and interactive web applications to make sure they work well on both desktop and mobile devices.

Projects:

FinFox App - Frontend Mobile Development

Tech Stack: React Native (Expo), Typescript, AI, Tamagui (UI), Redux & Toolkit, Firebase Authentication

- Developed a fintech mobile app for Android and iOS using React Native with the Expo framework and typescript.
- Implemented graph visualizations and detailed statistics for clear financial insights.
- Integrated AI chat personal finance tools to analyze spending patterns.
- Enabled spending limit settings and savings features through secure bank detail integration.
- Delivered a user-friendly experience to empower smarter financial decisions for users.

[Link](#) **Tackles** - Full Stack Mobile Application Development

Tech Stack: React Native (Expo), TypeScript, Context API, Air table Database (Cloud)

- Built user friendly, responsive iOS/Android app with React Native (TypeScript).
- Created models in Air table and fetched data into front-end development.
- Used skeleton loading and animation in modal to make user engagement.
- Users can book services and add their current location through maps.
- Developed country/city filtering for easy service & finding professionals.

[Link](#) **Real Estate** - Full stack mobile app development

Tech Stack: React Native (Expo), TypeScript, Golang, AWS (S3), PostgreSQL, React Query, Oauth

- Frontend Development using React Native (Typescript) to create an interactive, intuitive, and responsive user interface.
- Backend implementation builds using Go to handle API integration and database operation using PostgreSQL.
- User Authentication: Implemented user authentication and authorization using Oauth, Session, and JWT.
- CRUD in Properties, Search Properties: Created a Map feature where user can add properties in map & view the property.

[Link](#) **Community App** - Full stack mobile app development

Tech Stack: React Native (Expo), TypeScript, Supabase, Clerk, Jotai

- Built a community-driven social media app for Android and iOS using React Native with TypeScript.
- Implemented real-time group chat and notification system for seamless community communication.
- Developed community management features including member roles, posts, and group discovery.
- Integrated full authentication flow using Clerk with secure session and user profile management.
- Managed global state efficiently using Jotai for performant and scalable app architecture.

Education:

Bachelor of Science in Computing

Islington College, Kathmandu, Nepal (*Sept 2021 – June 2024*)
